JOURNAL OF THE air pollution control ASSOCIATION

ANNUAL INDEX OF AUTHORS AND TITLES

Volume 17 (January-December 1967)

This annual index of authors and titles for Volume 17 of the *Journal of the Air Pollution Control Association* is published as a reader service on the following specially-numbered pages.

The author index, appearing on pages ii through iv, lists authors alphabetically and their works chronologically.

The title index, appearing on pages v through vii, is subdivided into ten broad classifications with titles listed alphabetically in each category.

Other author and title indexes include:

Volumes 1 through 4, which was published in Volume 1 Number 1 of the *APCA Abstracts*, June 1955.

Volumes 5 through 15, which was published in Part II of the *APCA Journal*, May 1966.

Volume 16, which was published in the *APCA Journal*, January 1967.

AIR POLLUTION CONTROL ASSOCIATION, 4400 Fifth Avenue, Pittsburgh, Pa. 15213

AUTHOR INDEX

Adams, D. F. Direct GLC coulometric analysis of kraft mill gases. 17(3) 161–165

Ahlquist, N. C. A new instrument for evaluating the visual quality of air. 17(7) 467–469

Ajax, R. L. The effects of air pollution on the fading of dyed fabrics. 17(4) 220–224

Albert, R. E. The production of test aerosols for inhalation studies. 17(9) 586

Allee, P. A. Some recent results on the cold chamber technique for detecting sub-micron lead particles in air. 17(9) 574

Altshuller, A. P. Photochemical reactivities of exhausts from 1966 model automobiles equipped to reduce hydrocarbon emissions. 17(11) 734–737

Arnold, G. Urban development in air pollution basins: an appeal to the planners for help. 17(4) 235–237

Auerbach, I. L. The importance of public education in air pollution control. 17(2) 102–104

Ayer, H. E. Aerosol research at the Division of Occupational Health, Public Health Service, Cincinnati. 17(9) 585

Baker, C. Some improvements in the determination of benzo[a]pyrene in air samples. 17(12) 818–821

Belyea, H. A. Flame temperature in oil-fired fuel-burning equipment and its relationship to carbonaceous particulate emissions. 17(5) 320–323

Benander, L. Determination of the respiratory deposition and size of airborne radioactive particles by graded filtration. 17(9) 582

Benson, F. B. Relationships between Sulphur Dioxide concentration determined by the West-Gaeke and Electroconductivity methods. 17(10) 673–675

Bevis, D. A. Comparison of H.E.P.A. Filter efficiencies using thermal- and Air-jet-generated D.O.P. 17(9) 607

Blemel, K. G. Analyzing air pollutant concentration and dosage data. 17(2) 85–93

Bloomfield, B. D. Costs, efficiencies, and unsolved problems of air pollution control equipment. 17(1) 28–32

Bockian, A. H. Suspended particulates in the Los Angeles atmosphere. 17(9) 580

Bonamassa, F. The influence of vehicle operating variables on exhaust emissions. 17(6) 384–387

Booras, S. G. The effects of air pollution on exposed cotton fabrics. 17(5) 294–298

Bourbon, P. Analytical problems posed by pollution by fluorine compounds. 17(10) 661–663

Brehob, W. M. The influence of improved mixture quality on engine exhaust emissions and performance. 17(7) 446–453

Brock, J. R. Dynamic theories of knudsen aerosols. 17(9) 589

Brysson, R. J. The effects of air pollution on exposed cotton fabrics. 17(5) 294–298

Bunyard, F. L. Interstate air pollution study—St. Louis area air pollutant emissions related to actual land use. 17(4) 215–219

Burgess, W. A. Current aerosol research at the Harvard School of Public Health. 17(9) 608

Burleson, F. R. Analysis of the atmosphere for light hydrocarbons. 17(3) 147–153

Burson, J. H. Aerosol research in chemical engineering at Georgia Tech. 17(9) 590–592

Calvert, S. Aerosol research activities at the Center for Air Environment Studies, The Pennsylvania State University. 17(9) 592–596

Charlson, R. J. A new instrument for evaluating the visual quality of air. 17(7) 467–469

——. An integrating nephelometer for studies of air pollution aerosols. 17(9) 585

Chass, R. L. Control of contaminant emissions from fossil fuel-fired boilers. 17(6) 392–395

Cochran, J. A. Determination of the respiratory deposition and size of airborne radioactive particles by graded filtration. 17(9) 582

Cohen, J. J. Use of parachute-borne air samplers for evaluating instantaneous point-source aerosol clouds. 17(9) 582

Cohen, J. L. Interstate compacts—an evaluation. 17(10) 676–678

Cole, A. L. Air pollution by ragweed pollen. 17(10) 651–658

Conlee, C. J. The effects of air pollution on the fading of dyed fabrics. 17(4) 220–224

Corn, M. Adherence of sulfur dioxide concentrations in the vicinity of a steam plant to plume dispersion models. 17(8) 512–517

——. Aerosol research at the University of Pittsburgh. 17(9) 606–607

Cote, W. C. The performance of positive crankcase ventilation systems on automobiles in Cincinnati, Ohio: Report No. 2. 17(3) 139–141

Cown, W. B. Aerosol research in the Bioengineering Laboratory, Engineering Experiment Station, Georgia Institute of Technology. 17(9) 604

Crocker, G. R. The formation, distribution, and characteristics of radioactive fallout. 17(9) 578–579

Crouse, W. R. Source inventory IBM system for particulate and gaseous pollutants. 17(8) 508–511

Dammkoehler, A. R. Process evaluation system developed for the emission inventory. 17(3) 168–171

Danis, A. L. A multivariable model for atmospheric dispersion predictions. 17(4) 211–214

Darley, E. F. Role of particle size in studies on effects of dusts on vegetation. 17(9) 579

Daunis, Diane. Carbon monoxide and sulfur dioxide adsorption on—and desorption from—glass, plastic, and metal tubings. 17(11) 753–756

Davidson, B. A summary of the New York urban air pollution dynamics research program. 17(3) 154–158

DeField, J. D. Comparison of H.E.P.A. filter efficiencies using thermal- and air-jet-generated D.O.P. 17(9) 607

DeGroot, I. Trends in public attitudes toward air pollution. 17(10) 679–681

Dimitriades, B. Determination of nitrogen oxides in auto exhaust. 17(4) 238–243

——. Methodology in air pollution studies using irradiation chambers. 17(7) 460–466

Dobbins, R. A. Sound propagation and optical extinction of aerosols. 17(9) 590

Dubois, L. Some improvements in the determination of benzo[a]pyrene in air samples. 17(12) 818–821

Duckworth, S. Air analysis: the standard dosage-area product. 17(6) 379–383

Dunning, J. A. The effects of ozone on tobacco and pinto bean as conditioned by several ecological factors. 17(2) 112–114

Edgerley, E., Jr. Urban development in air pollution basins: an appeal to the planners for help. 17(4) 235–237

Ehhalt, D. H. Methane in the atmosphere. 17(8) 518–519

TR-2 Air Pollution Measurements Committee. Recommended procedures for measuring odorous contaminants in the field. 17(9) 609–613

TITLE INDEX

For the convenience of the reader, this index has been subdivided into ten broad classifications, with titles listed alphabetically within each category. The groupings are as follows:

1. The Sources and Nature of Air Pollution
2. The Transport of Air Pollution
3. The Effects of Air Pollution
4. Controlling Air Pollution
5. Methods of Measurement
   (sampling, detection, evaluation, techniques, testing)
6. Survey Results and Interpretation
7. The Law and Air Pollution
   (legislation, administration, enforcement, standards, programs)
8. Education and Information Programs
9. Creating a Climate for Control
   (public relations, management concepts, social aspects)
10. Special Reports
    (not otherwise classified)

1. THE SOURCES AND NATURE OF AIR POLLUTION

The absorption of atmospheric sulfur dioxide by water solutions. F. P. Terraglio and R. M. Manganelli. 17(6) 403–406

Aerosol investigations—California State Department of Public Health. P. K. Mueller. 17(9) 583

Aerosol research activities at the Center for Air Environment Studies, The Pennsylvania State University. S. Calvert. 17(9) 592–596

Aerosol research activities at the National Center for Air Pollution Control, USPHS. J. Wagman. 17(9) 572–573

Aerosol research activities in the USAEC Health & Safety Laboratory. J. W. Thomas. 17(9) 574

Aerosol research at American Air Filter Co. W. A. Medcalf and E. J. Fortener. 17(9) 574

Aerosol research in the Bioengineering Laboratory, Engineering Experiment Station, Georgia Institute of Technology. T. W. Kethley and W. B. Cown. 17(9) 604

Aerosol research in chemical engineering at Georgia Tech. C. Orr, Jr., J. H. Burson, and E. Y. H. Keng. 17(9) 590–592

Aerosol research at the Division of Occupational Health, Public Health Service, Cincinnati. H. E. Ayer. 17(9) 585

Aerosol research efforts at the University of Florida. R. S. Sholtes. 17(9) 598

Aerosol research at IIT Research Institute. A. Lieberman. 17(9) 587–588

Aerosol research—University of Minnesota. K. T. Whitby. 17(9) 576–578

Aerosol research at the University of Pittsburgh. M. Corn. 17(9) 606–607

Aerosol studies at Rutgers University. F. J. Haughey. 17(9) 596–597

Air pollution aspects of the inedible rendering industry. TI-2 Chemical Committee (APCA). 17(2) 94–97

Air pollution aspects of soap and detergent manufacture. TI-2 Chemical Committee (APCA). 17(8) 505–507

Air pollution by ragweed pollen. E. W. Hewson, W. W. Payne, A. L. Cole, J. B. Harrington, Jr., and W. R. Solomon. 17(1) 651–658

Atmospheric emissions from open burning. R. W. Gerstle and D. A. Kemnitz. 17(5) 324–327

Current aerosol research at the Harvard School of Public Health. P. C. Reist, W. A. Burgess, and M. W. First. 17(9) 608

Current research on aerosols at Pacific Northwest Laboratory. A. K. Postma and L. C. Schwendiman. 17(9) 599–602

Dynamic theories of Kundsen aerosols. J. R. Brock. 17(9) 589

Flame temperature in oil-fired fuel-burning equipment and its relationship to carbonaceous particulate emissions. H. A. Belyea and W. J. Holland. 17(5) 320–323

Formation of aerosol particulates derived from naturally occurring hydrocarbons produced by plants. F. W. Went. 17(9) 579–580

The formation, distribution, and characteristics of radioactive fallout. G. R. Crocker. 17(9) 578–579

History of efforts at incineration in the Los Angeles area. N. B. Hume. 17(5) 308–309

The influence of improved mixture quality on engine exhaust emissions and performance. J. A. Robison and W. M. Brehob. 17(7) 446–453

The influence of vehicle operating variables on exhaust emissions. G. C. Hass, F. Bonamassa, P. Newmark, and N. Kayne. 17(6) 384–387

Introduction to (special issue on) aerosol research. D. Lundgren. 17(9) 571

Kinetics of sulfur-oxide formation in flames: Low pressure H_2S flames. E. L. Merryman and A. Levy. 17(12) 800–806

Methane in the atmosphere. D. H. Ehhalt. 17(8) 518–519

Particle size distribution of urban lead aerosols. E. Robinson and F. L. Ludwig. 17(10) 664–669

Photochemical reactivities of exhausts from 1966 model automobiles equipped to reduce hydrocarbon emissions. A. P. Altshuller, S. L. Kopczynski, W. Lonneman, and D. Wilson. 17(11) 734–737

Sound propagation and optical extinction of aerosols. R. A. Dobbins. 17(9) 590

Source inventory IBM system for particulate and gaseous pollutants. W. R. Crouse and N. E. Flynn. 17(8) 508–511

Suspended particulates in the Los Angeles atmosphere. R. D. MacPhee and A. H. Bockian. 17(9) 580

Transformation of gaseous reactive hydrocarbons into aerocolloids by ultraviolet irradiation. A. Goetz and O. J. Klejnot. 17(9) 602–603

2. TRANSPORT OF AIR POLLUTION

Adherence of sulfur dioxide concentrations in the vicinity of a steam plant to plume dispersion models. T. L. Montgomery and M. Corn. 17(8) 512–517

An atmospheric diffusion model for metropolitan areas. M. E. Miller and G. C. Holzworth. 17(1) 46–50

Atmospheric pollution considerations affecting the ultimate capacity of a thermal-electric power plant site. TI-5 Committee (APCA). 17(7) 470–473

Lake effects on air pollution dispersion. E. W. Hewson and L. E. Olsson. 17(11) 757–761

A multivariable model for atmospheric dispersion predictions. J. B. Koogler, R. S. Sholtes, A. L. Danis, and C. I. Harding. 17(4) 211–214

A note on comparison of statistical and analytical results for calculating oxides of nitrogen concentrations. M. E. Miller. 17(4) 232–234

A summary of the New York urban air pollution dynamics research program. B. Davidson. 17(3) 154–158

The use of meteorological towers in urban air pollution programs. R. E. Munn and I. M. Stewart. 17(2) 98–101

3. EFFECTS OF AIR POLLUTION

Atmospheric corrosion studies in two metropolitan areas. J. B. Upham. 17(6) 398–402

Carbon monoxide and sulfur dioxide adsorption on—and desorption from—glass, plastic, and metal tubings. H. C. Wohlers, H. Newstein and Diane Daunis. 17(11) 753–756

Carcinogenicity of organic extracts of atmospheric pollutants. S. S. Epstein. 17(11) 728–729

Determination of the respiratory deposition and size of airborne radioactive particles by graded filtration. B. Shleien, J. A. Cochran, L. Benander, and A. G. Friend. 17(9) 582

The effects of air pollution on exposed cotton fabrics. R. J. Brysson, B. J. Trask, J. B. Upham, and S. G. Booras. 17(5) 294–298

The effects of air pollution on the fading of dyed fabrics. R. L. Ajax, C. J. Conlee, and J. B. Upham. 17(4) 220–224

The effects of ozone on tobacco and pinto bean as conditioned by several ecological factors. W. W. Heck and J. A. Dunning. 17(2) 112–114

Effects of photochemical air pollution on vegetation with relation to the air quality requirements. L. S. Jaffe. 17(1) 38–42

The effects of photochemical oxidants on materials. L. S. Jaffe. 17(6) 375–378

Estimation of smog effects in the hydrocarbon-nitric oxide system. J. C. Romanovsky, R. M. Ingels, and R. J. Gordon. 17(7) 454–459

Horizontal and vertical distribution of corrosion rates in an industrialized seacoast city. C. I. Harding and T. R. Kelley. 17(8) 545–547

Identification of paint-discolored species by electron diffraction. J. A. Reffner, C. I. Harding, and T. R. Kelley. 17(1) 36–37

Measurements of morbidity and mortality related to air pollution. J. McCarroll. 17(4) 203–209

Peroxyacetyl nitrate-induced inhibition of cell wall metabolism. L. Ordin, M. A. Hall, and M. Katz. 17(12) 811–815

The production of test aerosols for inhalation studies. M. Lippmann, R. E. Albert, and S. Laskin. 17(9) 586

Response of rat lung mast cells to nitrogen dioxide inhalation. H. V. Thomas, P. K. Mueller, and R. Wright. 17(1) 33–35

Role of particle size in studies on effects of dusts on vegetation. E. F. Darley, R. J. Oshima, and S. Lerman. 17(9) 579

A special purpose plant environmental chamber for air pollution studies. A. C. Hill. 17(11) 743–748

Therapeutic studies of aerosols. J. F. Tomashefski. 17(9) 583

4. CONTROLLING AIR POLLUTION

Air pollution equipment for foundry cupolas. R. W. McIlvaine. 17(8) 540–544

Comparison of H.E.P.A. filter efficiencies using thermal- and air-jet-generated D.O.P. H. J. Ettinger, J. D. DeField, D. A. Bevis, and R. N. Mitchell. 17(9) 607

Control of contaminant emissions from fossil fuel-fired boilers. R. E. George and R. L. Chass. 17(6) 392–395

Costs, efficiencies, and unsolved problems of air pollution control equipment. B. D. Bloomfield. 17(1) 28–32

Desulfurization of Caribbean fuel. H. H. Meredith, Jr. 17(11) 719–723

Electric-wind turbulence in electrostatic precipitation. M. Robinson. 17(9) 605–606

Electrostatic precipitation studies at Carnegie Institute of Technology. G. W. Penney. 17(9) 588–589

Endurance of fiberglass filter fabrics. P. W. Spaite and R. E. Harrington. 17(5) 310–313

Fuel oil additives for controlling air contaminant emissions. E. Z. Finfer. 17(1) 43–45

Impingement baffles to reduce emissions from coke quenching. R. W. Fullerton. 17(12) 807–809

Optimization of flow for forcing stack wastes to high altitudes. T. Fohl. 17(11) 730–733

The performance of positive crankcase ventilation systems on automobiles in Cincinnati, Ohio: Report no. 2. W. C. Cote. 17(3) 139–141

Progress in high-temperature electrostatic precipitation. C. C. Shale. 17(3) 159–160

The removal of particulate matter from fluid bed catalytic cracking unit stack gases. J. G. Wilson and D. W. Miller. 17(10) 682–686

A state of the art report on industrial precipitator control equipment. TA-5 Dust, Fumes, Mists and Fog Collectors Committee (APCA). 17(11) 724–727

Studies on a new method of simultaneously removing sulfur dioxide and oxides of nitrogen from combustion gases. P. R. Ryason and J. Harkins. 17(12) 796–799

A study of catalyst support systems for fume-abatement of hydrocarbon solvents. M. R. Miller and H. J. Wilhoyte. 17(12) 791–795

A study of venturi scrubbers. L. Theodore. 17(9) 598–599

Sulfur dioxide removal and recovery from pulp mill power plants. S. F. Galeano and C. I. Harding. 17(8) 536–539

5. METHODS OF MEASUREMENT (sampling, detection, evaluation, techniques, testing)

Aerosol measurements in the troposphere and stratosphere. L. Elterman. 17(9) 596

An aerosol sampler for determination of particle concentration as a function of size and time. D. A. Lundgren. 17(4) 225–228

Air analysis: the standard dosage-area product. S. Duckworth and E. Kupchanko. 17(6) 379–383

Analysis of the atmosphere for light hydrocarbons. E. R. Stephens and F. R. Burleson. 17(3) 147–153

Analytical problems posed by pollution by fluorine compounds. P. Bourdon. 17(10) 661–663

Computer analysis of the California cycle. R. S. Spindt. 17(3) 166–167

The continuous analysis of sulfur dioxide in gaseous samples. N. A. Lyshkow. 17(10) 687–689

Determination of nitrogen oxides in auto exhaust. B. Dimitriades. 17(4) 238–243

Direct GLC coulometric analysis of kraft mill gases. D. F. Adams and R. K. Koppe. 17(3) 161–165

An integrating nephelometer for studies of air pollution aerosols. R. J. Charlson. 17(9) 585

The interstate air pollution surveillance program effects network. G. A. Jutze, R. L. Harris, Jr., and M. Georgevich. 17(5) 291–293

Manual procedures for the estimation of atmospheric fluorides. G. H. Farrah. 17(11) 738–741

Methodology in air pollution studies using irradiation chambers. B. Dimitriades. 17(7) 460–466

Multipurpose sequential samplers. W. R. Parker and N. A. Huey. 17(6) 388–391

New and improved procedures for gas sampling and analysis in the national air sampling network. G. B. Morgan, C. Golden, and E. C. Tabor. 17(5) 300–304

A new instrument for evaluating the visual quality of air. N. C. Ahlquist and R. J. Charlson. 17(7) 467–469

A new photometer for aerosol particle size analysis. D. Sinclair. 17(2) 105–108

Polystyrene aerosol determination by infrared spectrophotometry. S. H McIver. 17(9) 581

Recommended procedures for measuring odorous contaminants in the field. TR-2 Air Pollution Measurements Committee (APCA). 17(9) 609–613

Recommended standard method for atmospheric sampling of fine particulate matter by filter media—High-Volume Sampler. TR-2 Air Pollution Measurements Committee. 17(1) 17–25

Relationships between sulphur dioxide concentration determined by the West-Gaeke and electroconductivity methods. M. Terabe, S. Oomichi, F. B. Benson, V. A. Newill, and J. E. Thompson. 17(10) 673–675

Research on the acoustic particle sensor and its application to air diffusion studies. G. Longer. 17(9) 597–598

Sampling airborne solids in a dust following a 90° bend. E. B. Sansone and P. M. Giever. 17(9) 605

Selection of adhesive-coated materials for particulate sampling. W. L. Pritchard, C. E. Schumann, and C. W. Gruber. 17(5) 305–307

Some improvements in the determination of Benzo [a] Pyrene in air samples. L. Dubois, A. Zdrojewski, C. Baker, and J. L. Monkman. 17(12) 818–821

Some recent results on the cold chamber technique for detecting sub-micron lead particles in air. G. Morgan, Jr. and P. A. Allee. 17(9) 574

Urban arerosol: Count-size related to meteorologic data. H. J. Paulua and C. M. Peterson. 17(9) 575

Use of parachute-borne air samplers for evaluating instantaneous point-source aerosol clouds. J. J. Cohen. 17(9) 582

6. SURVEY RESULTS AND INTERPRETATION

Analyzing air pollutant concentration and dosage data. R. I. Larsen, C. E. Zimmer, D. A. Lynn, and K. G. Blemel. 17(2) 85–93

The effect of rapid transit on San Francisco Bay air quality. E. W. McHugh. 17(5) 277–279

Interstate air pollution study—St. Louis area air pollutant emissions related to actual land use. F. L. Bunyard and J. D. Williams. 17(4) 215–219

A status report on motor vehicle pollution in California. J. A. Maga, H. Wong-Woo, and M. G. Mason. 17(7) 435–438

7. THE LAW AND AIR POLLUTION (legislation, administration, enforcement, standards, programs)

California experience with air quality standards. J. A. Maga. 17(2) 109–111

Determining reduced-emission goals needed to achieve air quality goals—A hypothetical case. R. I. Larsen. 17(12) 823–829

How computers aid air management. R. I. Larsen. 17(7) 439–445

Interstate compacts—an evaluation. J. L. Cohen. 17(10) 676–678

Measuring the improvements in the control aspects of programs aided by federal grants. C. D. Yaffe and W. F. Johnson. 17(5) 316–318

Organizational and operational techniques for relieving manpower shortages in air pollution control agencies. J. J. Schueneman. 17(10) 670–672

Process evaluation system developed for the emission inventory. P. Loquercio, A. R. Dammkoehler, and R. Goldberg. 17(3) 168–171

Summary of air pollution actions in 1966 state legislatures. 17(2) 115–118

SWO-NK's air quality criteria and emission regulations. A. H. Phelps, Jr. 17(11) 749–751

Urban development in air pollution basins: an appeal to the planners for help. G. Arnold and E. Edgerley, Jr. 17(4) 235–237

8. EDUCATION AND INFORMATION PROGRAMS

APCA: A mission and a method through sixty years of service. H. M. Englund. 17(6) 371–373

Gaining public acceptance for California's auto smog control program. R. Kovitz. 17(1) 26–27

The importance of public education in air pollution control. I. L. Auerbach and K. Flieger. 17(2) 102–104

9. CREATING A CLIMATE FOR CONTROL

(public relations, management concepts, social aspects)

A method for using air pollution measurements and public opinion to establish ambient air quality standards. W. W. Stalker and C. B. Robison. 17(3) 142–144

The opportunities for the industrial scientist-engineer in air pollution research. R. L. Myers, 17(12) 816–817

Trends in public attitudes toward air pollution. I. DeGroot. 17(10) 679–681

10. SPECIAL REPORTS

(not otherwise classified)

A bibliography of air pollution films. H. M. Englund. 17(5) 281–286

"Control now for clean air." Report from the National Conference on Air Pollution includes chairmen's summaries of panel sessions (December 12–14, 1966). 17(2) 73–84

Pollution and our environment. A report on the National Conference on Pollution sponsored by the Canadian Council of Resource Ministers (Oct. 31–Nov. 4, 1966). 17(1) 7–9

Product Guide/1968. Directory lists manufacturers of emission control equipment and air pollution instrumentation. 17(12) 843–851

Summary of the 60th Annual Meeting of the Air Pollution Control Association, held June 11–16, 1967 in Cleveland, Ohio. 17(8) 521–534

ATLAS ANALYZERS and CONTROLLERS for

O_3

AND TOTAL OXIDANTS

SO_2

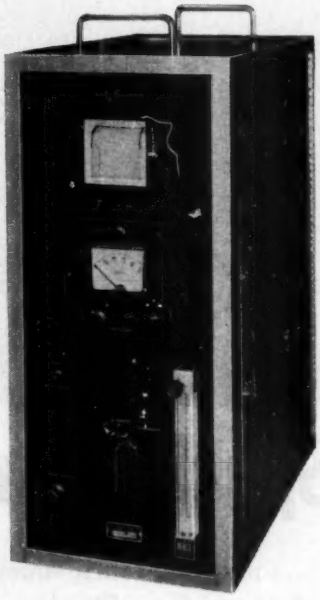
AND OTHER REDUCING AGENTS

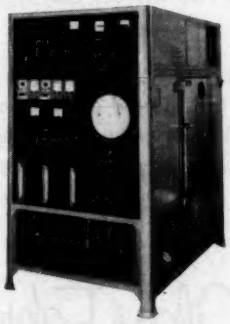
NO_2

for use wherever specific concentrations of gases are to be measured or controlled.

- New Schulze Methods of Analysis (Patent applied for)
- Accurate analysis with high sensitivity
- Variations of 0.001 ppm/v can be detected
- Extremely fast response
- Built-in electronic calibration
- Continuous recording
- Unattended weekly operation
- Shipped complete, ready to operate

Write for complete technical information





ATLAS 600 Series
Weather-Ometer® and test chamber

Atmospheric contaminants can be controlled automatically in combination with temperature and humidity with or without simulated sunlight. Basic models available with variations of controls.

For over 40 years manufacturers of testing machines for Weathering and Fading.

ATLAS ELECTRIC DEVICES COMPANY / 4114 N. Ravenswood Ave. Chicago, Illinois U.S.A. 60613 Phone: 312-327-4520
